Degree/Board	Institution	Year	CPI/%
B.Tech, IT	National Institute of Technology Raipur	2022 - Present	6.77/10.0
CBSE – XII	B.S.P. Senior Secondary School, Bhilai	2021	72%
CGBSE – X	Krishna Public School, Durg	2019	85.5%

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL
Databases & Storage: PostgreSQL, MongoDB, Neo4j, Redis
Machine Learning & Deep Learning: PyTorch, scikit-learn, Transformers, CNNs, RNNs, Attention Mechanisms, Model Evaluation
Speech, Generative AI & NLP: LLMs, Prompt Engineering, Retrieval-Augmented Generation (RAG), Speech Processing, Hugging Face
Agentic AI & Orchestration: LangChain, LangGraph, LlamaIndex, CrewAI, AutoGen, n8n, MCP (Model Context Protocol)
Backend, APIs & Frontend: FastAPI, Flask, REST APIs, WebSockets, Node.js, React.js
MLOps, Deployment & Observability: Docker, Kubernetes, AWS, GitHub Actions (CI/CD), Jenkins, MLflow, Experiment Tracking, Model Registry, Prometheus, Grafana

PROJECTS

- Medical RAG Chatbot [Link]**
LLMOps / Advanced RAG Jan 2025 - Feb 2026
 - Built an evidence-grounded **medical RAG assistant** over **user-uploaded PDFs**, enabling context-aware question answering with retrieval-backed responses.
 - Engineered the ingestion and retrieval pipeline using PDF parsing, **parent-child chunking**, **sentence-transformers** embeddings, **FAISS** indexing, and reranking for higher answer relevance.
 - Tech Stack:** Python, LangChain, FAISS, sentence-transformers, faster-whisper, Edge TTS, Docker, Jenkins, Trivy, AWS (ECR, App Runner)
- Swiggy Delivery Time Prediction [Link]**
Machine Learning & MLOps Sep 2025 - Oct 2025
 - Built an end-to-end **ETA prediction system** using geospatial, temporal, traffic, and city-level features for delivery time estimation.
 - Trained and optimized a **Stacking Regressor (Random Forest + LightGBM)** with **Optuna**, achieving **~3.1 min MAE** on evaluation data.
 - Implemented reproducible ML workflows with **MLflow** for experiment tracking and model registry, **DVC** for data and pipeline versioning, and containerized **FastAPI** deployment on AWS.
 - Tech Stack:** Python, scikit-learn, LightGBM, Optuna, MLflow, DVC, FastAPI, Docker, GitHub Actions, AWS (ECR, EC2, ASG)
- Fully Self Driving Car [Link]**
Computer Vision & Deep Learning Jun 2025 - Jul 2025
 - Developed a real-time **self-driving car simulator** achieving **>93% steering angle prediction accuracy** on test data.
 - Trained a 5-layer **CNN** based on NVIDIA’s end-to-end driving architecture over **45,000+ frames**, and integrated **YOLOv8 segmentation** for lane and object understanding.
 - Simulated and visualized **10,000+ frames** with **OpenCV** at **30 FPS**, enabling smooth steering control and real-time driving behavior playback.
 - Tech Stack:** Python, PyTorch, YOLOv8, OpenCV, NumPy, Google Colab

WORK EXPERIENCE

- CredResolve [Link]**
AI Developer Engineer Intern *Gurgaon, India*
Feb’26 - Present
 - **Multilingual ASR Infrastructure for AI Voice Assistant:**
 - Built a production-grade, multilingual **streaming ASR system** for CredResolve’s in-house **AI voice bot**, supporting low-latency audio streaming and transcript delivery.
 - Designed a scalable **Gateway-Worker** architecture using **FastAPI**, **Redis**, and **Triton Inference Server** to separate real-time session control from GPU-backed inference.
 - Improved ASR quality and operational visibility through **LID routing**, **context biasing**, domain-specific fine-tuning, **WER evaluation**, and monitoring with **Prometheus/Grafana**.
 - **Tech Stack:** Python, FastAPI, PyTorch, Triton Inference Server, Redis, WebSockets, Docker, AWS, Prometheus, Grafana
- Vishvarupa:**
 - Built **Vishvarupa ([Link])**, a personalized **AI video platform** for multilingual avatar and text-video generation from lead data.
 - Shipped async **FastAPI + SQS** pipelines powering **HeyGen/Remotion** rendering and **S3** delivery.
 - Tech Stack:** Python, FastAPI, React, Remotion, HeyGen, AWS, MongoDB, Docker

ACHIEVEMENTS

- CodeChef Starters 205 Div3 **Global Rank: 233**
- Solved **600+ competitive programming problems** across multiple platforms
- Solved **100+ SQL challenges** demonstrating strong database query and optimization skills
- Top 1800 out of 50,000+ teams at **Amazon HackOn Season 5**.
- Represented **Chhattisgarh** at the **National Junior and Sub-Junior Chess Championships**

POSITIONS OF RESPONSIBILITY

- Head Coordinator — Technical Domain**
Think India [Link] Oct’24 - Present
 - Led end-to-end development and maintenance of the Think India website, deployed and hosted on the official domain.
 - Organised and coordinated technical workshops for students—handled planning, speaker coordination, registrations, and smooth on-ground execution.
- Student Coordinator**
Unnat Bharat Abhiyan, NIT Raipur Aug’24 - Present
 - Coordinated student volunteers and on-ground activities for UBA initiatives, ensuring smooth execution and timely updates.
 - Supported village need-assessment surveys and consolidated findings to help plan impactful community interventions.
 - Facilitated communication with local stakeholders for awareness and outreach programs.
